Lifelong Learning Programme

This project has been funded with support from the European Commission. This communication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

The **STELLA** project has been funded with support from the European Commission within the Lifelong Learning Programme with the aim to *contribute to the improvement of science teaching in European schools*, in particular in order to **stimulate young people to undertake science studies and careers, with a special focus also on girls.**

The **STELLA** web portal addresses all people involved in science education who want to communicate experiences, cooperate, and exchange ideas and thoughts on teaching methods and approaches.

<http://www.stella-science.eu>

The “**European catalogue of science education initiatives**” contains initiatives realised in schools all over Europe. Through the catalogue you can present your initiatives to colleagues of all over Europe and at the same time have a look at what is done in other schools and countries.

*Are you a teacher or a school head? Are you carrying out or managing a science education project?*

***SUBMIT YOUR INITIATIVE*** to the *European catalogue of science education initiatives!*

Please fill in the online questionnaire which is for free and takes you only some minutes:

[http://www.stella-science.eu/submit\\_initiative.php](http://www.stella-science.eu/submit_initiative.php)

**Communities & Forums:** promote the exchange of practices and ideas among schools, teachers and practitioners all over Europe, by publishing news and articles and by hosting discussions on dedicated forums.

**Multimedia tools:** help teachers to describe in an interactive way their projects and activities, by encouraging also pupils and students to take part in the documentation process.

**Pool of good practices:** highlights the most interesting science education initiatives included in the European catalogue and described using multimedia tools.
