## Science Teaching in a Lifelong Learning Approach

<http://www.stella-science.eu>

Lifelong Learning Programme

**STELLA is an interactive and multilingual web portal for all people involved in science education who want to communicate experiences, cooperate, exchange ideas and thoughts on teaching methods and approaches.**

Main STELLA outcomes include:

- **European Catalogue of Science Education Initiatives** - with over 800 initiatives realised in schools all over Europe
- **Multimedia Tools** - with a number of tools and mini-units on the use of different applications like Powerpoint, Blog, Video, Discussion Forum, eTwinning, and Web 2.0 applications like YouTube, Wikipedia, Flickr, Myspace, Del.icio.us, and the **Stella Guidelines “Documenting Science Education Projects – A Selection of Multimedia Tools”**
- **Pool of Good Practices** - with the **Stella eBook “Science Education in European Schools - Selected Practices from the STELLA catalogue”** including a number of science education projects and initiatives carried out in different European countries
- **Communities** - virtual and open spaces for exchanging practices and ideas among schools, teachers and science education practitioners all over Europe

Meet the STELLA project!

The **STELLA national workshops** are held in Bulgaria, Germany, Italy and Portugal in autumn 2009.

The **STELLA final conference** takes place in **Nancy, France, on 18 November 2009**, and is broadcasted on the Internet in English and French.

To find out more about the STELLA workshops and conference, please have a look at the [STELLA web site](#).
